Carbon Capture Programme

Premier Paper is offering customers and their clients the opportunity to capture the CO₂ emissions from their paper purchases by planting and conserving native woodland right here in the UK.

How it works

Premier calculates the amount of CO₂ generated per tonne of paper and this amount appears as a separate invoice line. Then, by working with the UK based environmental charity The Woodland Trust, the equivalent amount (or more) of CO₂ is captured by planting and conserving native woodland here in the UK. The scheme is facilitated by the Woodland Trust and is part of the government's Woodland Carbon initiative backed by the Forestry Commission and audited by Price Waterhouse Cooper.

It is estimated that 25 square metres of native British woodland captures and locks up 1 tonne of CO₂.

Offer your customers carbon captured papers

Customers may also wish to further capture their CO₂ emissions through the Woodland Trust and we will offer advice and guidance on how this can be achieved.

For high end luxury packaging and graphical applications

Ensocoat is a single side coated graphical board produced using virgin fibres, with an exceptional white shade and smoothness for excellent print results.

Ensocoat is Stora Enso's flagship board crafted to meet the demands of the graphics industry and luxury packaging. Produced from responsibly sourced, certified raw materials, it serves as the industry standard for high performance and sustainability.

As a high-end graphical board, Ensocoat offers the best of the best in all performance areas.

Superior creasing & folding properties and resistant to cracking on the folds.

For high end graphical products as well as luxury and cosmetics packaging

Ensocoat 2S by Stora Enso offers top quality for graphical products as well as luxury and cosmetics packaging. A beautiful two-side coated SBS board, it features a double-pigment coating on both the top and the reverse sides which lends a symmetrical appearance to the board.

In packaging, super-smooth Ensocoat 2S is typically used in cosmetics packaging, perfume and other elegance care products as well as premium confectionery and chocolate packaging. Ensocoat 2S also makes a popular choice for graphical products that require symmetric print results on both sides, like brochures, menus, greeting cards, folders, tickets and tags.

For premium packaging and graphical applications

Algro Design is a one side double-coated solid bleached cartonboard, with a remarkable silky touch and uncoated reverse.

The superior whiteness offers a fresh and clean look and a high resistance to aging combined with superior colour reproduction and colour range.

Algro Design high stiffness make it a strong performer across all finishing techniques such as hot foil and UV-spot varnishing as well as having excellent embossing properties.

Algro Design is ISEGA certified for direct food contact and DIN EN 71 Safety of toys.

INVERCOTE!®

Invercote Creato Digital

For prestigious packaging and graphical products

Invercote Creato is a two-sided, multi layered, solid bleached board. With its super smooth surface, this product is ideal for the packaging of luxury products.

Thanks to its composition of solid bleached primary fibres, Invercote Creato has a superior strength and toughness compared to board grades that contain mechanical or recycled fibres or single-ply bleached primary fibre board.

Invercote Creato is ideal for colour laser/dry toner printers and is also HP Indigo certified.

Performa White GC1

For high performance, premium packaging and graphical applications

Performa White FSC® is an aesthetically appealing folding boxboard that combines performance with a beautiful white appearance. Thanks to its triple-coated top side, Performa White FSC® delivers fantastic print results, and the white reverse side is also Ricoh approved (on certain weights) and is suitable for full-colour printing. Its high brightness and whiteness contribute to an optimal visual experience.

This premium renewable paperboard is ideal for folding cartons for fragrance and cosmetics packaging, personal care products, and chocolates and confectioneries, where its proven taste and odour neutrality is a major benefit. It also performs well in graphical end uses and can stand up to the most demanding finishing effects.

Suggested Uses

- Greetings cards, calendars and covers
- Confectionery / chocolate packaging (Robinson’s test certified)
- Cosmetics packaging
- Beauty care and personal care products
- Pharmaceutical & healthcare packaging
- High end packaging & graphical applications
- Blister packaging (trials recommended)

CKB™ CARRIER

by Stora Enso

[Product Overview →](#)

[TechSheet →](#)

For food safe packaging applications where increased burst strength and tear resistance are required.

Produced by Stora Enso at their Imatra mill in Finland using 100% pure virgin fibre from responsibly managed forests, CKB™ CARRIER is a strong, robust and sturdy unbleached multi-layered kraft board most commonly used in the production of plastic-free food packaging, drinks packaging, bottle holders and more.

CKB™ CARRIER features a smooth, white coated top side combined with a kraft reverse that has a natural look and feel. This robust board offers an increased tear resistance, bending stiffness, and impressive tensile and burst strength providing the protection required to meet the challenges of wet-strength food packaging. CKB™ CARRIER boards are suitable for litho, flexographic, rotogravure print processes as well as embossing & hot foil stamping.

Suggested Uses

- Bottle carriers
- Dry food packaging
- Chilled food packaging
- Frozen food packaging
- Organic goods
- Packaging for non-food items

Beer Mat Board

For beer mats and tags

A beer mat board you can raise your glass to; this product is uncoated and extremely bulky with high absorption qualities, the perfect place to rest your drink.

Beer Mat Board is suitable for litho print, screen print and letterpress with outstanding results; an excellent candidate for the production of promotional or branded drinks coasters.

This product is produced using 100% primary fibres from PEFC certified sustainable forests.

Suggested Uses

- Beer mat
- Tags
- Invites (can be embossed)
- Air freshener
