

Carton & Graphical Board Product Portfolio

A Global Company

Premier is part of the OVOL Japan Pulp & Paper Group, comprising of 112 companies, operating in 22 countries.

The Group is the world's leading specialist paper trading company which also has interests in other diverse sectors such as ICT systems, real estate and power generation.

Premier has close and strong working relationships with the major global paper producers and is now the preferred merchant partner for many of the world's leading paper mills.

Strong supplier relationships and being part of OVOL Japan Pulp & Paper's global company network supports Premier's future development ambitions.

Premier Board is the board division of Premier, part of OVOL Japan Pulp & Paper Group; the World's largest specialist paper distributor.

Product Choice

Premier offers an extensive choice of over 5,500 products, totalling some 40,000 tonnes of material available through its national branch network; this includes a wide range of carton and graphical boards from stock, cutter reels and ex-mill.

Premier Service

At Premier Board we are dedicated to providing the best service to our customers; a Premier service. Here are just some of the services that we provide to fulfil our customers' needs:

- We offer a split pallet service at no extra charge
- We sell in multiples of 100 sheets at no extra charge
- Our minimum order quantity is ONLY 100 sheets
- Both bulk packed and ream wrapped stock available
- We provide next day delivery on stock items
- We have a dedicated expert technical support
- Order up to 6:30pm for next day delivery

Delivered by Experts

Premier Board is a team of dedicated professionals, with wide ranging experience and knowledge of the carton and graphical board sectors.

With an excellent understanding of all carton and graphical board products and print technologies, we have people who are able to offer advice, information and recommendations so that customers may choose the right products to meet their needs.

At Premier, your orders will be delivered on our own fleet of vehicles, by a trained delivery team who care about customer service.

Carbon Capture Programme

Premier is offering customers and their clients the opportunity to capture the CO₂ emissions from their board purchases by planting and conserving native woodland right here in the UK.

How it works

Premier calculates the amount of CO₂ generated per tonne of material and this amount appears as a separate invoice line. Then, by working with the UK based environmental charity The Woodland Trust, the equivalent amount (or more) of CO₂ is captured by planting and conserving native woodland here in the UK. The scheme is facilitated by the Woodland Trust and is part of the government's Woodland Carbon initiative backed by the Forestry Commission and audited by Price Waterhouse Cooper.

It is estimated that 25 square metres of native British woodland captures and locks up 1 tonne of CO₂.

Offer your customers carbon captured papers and boards

Customers may also wish to further capture their CO₂ emissions through the Woodland Trust and we will offer advice and guidance on how this can be achieved.

For high end graphical products as well as luxury and cosmetics packaging

Ensocoat 2S by Stora Enso offers top quality for graphical products as well as luxury and cosmetics packaging. A beautiful two-side coated SBS board, it features a double-pigment coating on both the top and the reverse sides which lends a symmetrical appearance to the board.

In packaging, super-smooth Ensocoat 2S is typically used in cosmetics packaging, perfume and other elegance care products as well as premium confectionery and chocolate packaging. Ensocoat 2S also makes a popular choice for graphical products that require symmetric print results on both sides, like brochures, menus, greeting cards, folders, tickets and tags.

Suggested Uses

- Fragrance packaging
- Cosmetic packaging
- Premium packaging
- Confectionery packaging
- High end drinks packaging
- Promotional displays
- Covers & folders

Oppboga Truecoat C2S

For luxury and premium packaging and graphical applications

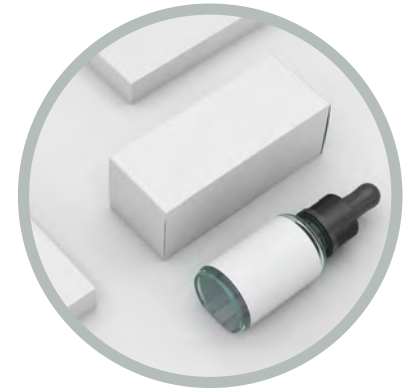

Oppboga Truecoat C2S is a solid bleached sulphate (SBS) board with a white double coating on both sides, ensuring good printability. The product has outstanding smoothness, lending itself perfectly to finishing techniques such as foil and film lamination. Its multi layered board structure can withstand the most challenging conversion process.

Invercote Creato Digital

For prestigious packaging and graphical products

Invercote Creato is a two-sided, multi layered, solid bleached board. With its super smooth surface, this product is ideal for the packaging of luxury products.

Thanks to its composition of solid bleached primary fibres, Invercote Creato has a superior strength and toughness compared to board grades that contain mechanical or recycled fibres or single-ply bleached primary fibre board.

Invercote Creato is ideal for colour laser/dry toner printers and is also HP Indigo certified.

Performa White GC1

For high performance, premium packaging and graphical applications

Performa White FSC® is an aesthetically appealing folding boxboard that combines performance with a beautiful white appearance. Thanks to its triple-coated top side, Performa White FSC® delivers fantastic print results, and the white reverse side is also Ricoh approved (on certain weights) and is suitable for full-colour printing. Its high brightness and whiteness contribute to an optimal visual experience.

This premium renewable paperboard is ideal for folding cartons for fragrance and cosmetics packaging, personal care products, and chocolates and confectioneries, where its proven taste and odour neutrality is a major benefit. It also performs well in graphical end uses and can stand up to the most demanding finishing effects.

Suggested Uses

- Greetings cards, calendars and covers
- Confectionery / chocolate packaging (Robinson's test certified)
- Cosmetics packaging
- Beauty care and personal care products
- Pharmaceutical & healthcare packaging
- High end packaging & graphical applications
- Blister packaging (trials recommended)

Printed on Accurate Freeze Grease III 490mic

For food safe packaging applications where increased burst strength and tear resistance are required.

Produced by Stora Enso at their Imatra mill in Finland using 100% pure virgin fibre from responsibly managed forests, CKB™ CARRIER is a strong, robust and sturdy unbleached multi-layered kraft board most commonly used in the production of plastic-free food packaging, drinks packaging, bottle holders and more.

CKB™ CARRIER features a smooth, white coated top side combined with a kraft reverse that has a natural look and feel. This robust board offers an increased tear resistance, bending stiffness, and impressive tensile and burst strength providing the protection required to meet the challenges of wet-strength food packaging. CKB™ CARRIER boards are suitable for litho, flexographic, rotogravure print processes as well as embossing & hot foil stamping.

Suggested Uses

- Bottle carriers
- Dry food packaging
- Chilled food packaging
- Frozen food packaging
- Organic goods
- Packaging for non-food items

Tamfold GC2

Large format FBB for various eye catching displays

Tamfold is a light coated GC2 folding boxboard with cream reverse. By having a bulk to grammage ratio better than most comparable grades, Tamfold offers huge yield advantages over competitor grades.

Tamfold folding boxboard is a true all-rounder for when performance, sustainability and reliability are paramount. Specially developed to deliver excellent stiffness and bulk attributes, Tamfold also performs well in printing and converting processes, including digital printing and laser and inkjet coding and is suitable for Braille embossing and other special finishing effects.

Suggested Uses

- Point of sale
- Hanging displays
- Internal signs
