

## Product information

eTEC Steel is a durable and versatile steel composite panel made from two high-strength steel skins bonded to an LDPE core.

One side features a high-white digital PE coating for vibrant colour reproduction and excellent ink adhesion, while the reverse has a high-gloss dry-wipe finish with anti-ghosting properties. Both surfaces are protected with an easy-peel protective film.

### Applications

Hoardings • Indoor and outdoor signage • Magnetic displays

### Print suitability

Latex • UV • Screen print

### Conversion suitability

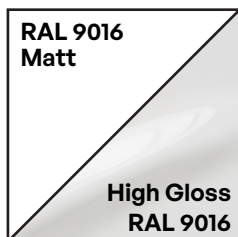

Saw cutting • Routing • Drilling
