

The lightest board in the range, designed for 2D and 2.5D signage and display applications. Its patented fluted core reduces material usage while maintaining controlled rigidity, and the high brightness white liner delivers strong printability, colour reproduction and a consistently smooth surface for impactful visual results.

Both the liners and core are made from 100% paper and contain no plastics, creating a fully fibre-based display solution. Additionally, there’s no harmful components and it uses water-based adhesives, allowing the board to be recycled as paper through standard wastepaper streams.

Applications

2D and 2.5D signs and display • Point of sale • Hanging signs

Print suitability

UV • Screen print • Latex

Stock schedule
