

Re-board® All Black

A lightweight yet strong fully recyclable fibre-based board with a fully black construction, including a matt black top layer and matching core for a consistent premium finish.

Built on the patented fluted core, it delivers excellent flatness, structural stability and design flexibility for 2D and 3D applications, while offering strong visual impact as a standalone material or as an accent within larger Re-board® builds.

Both the liners and core are made from 100% paper and contain no plastics, creating a fully fibre-based display solution. Additionally, there's no harmful components and it uses water-based adhesives, allowing the board to be recycled as paper through standard wastepaper streams.

Applications

Exhibition displays • Point of sale displays • Lightweight and recyclable furniture • Signs and display

Print suitability

UV • Screen print • Latex
