

Re-board® All White

A lightweight yet strong rigid paperboard with a patented white fluted core that provides excellent flatness, structural integrity and design flexibility. It is fully recyclable and engineered to support both 2D applications and complex 3D constructions.

Both the liners and core are made from 100% paper and contain no plastics, creating a fully fibre-based display solution. Additionally, there's no harmful components and it uses water-based adhesives, allowing the board to be recycled as paper through standard wastepaper streams.

Applications

Exhibition displays • Point of sale • Lightweight and recyclable furniture • Signs and display

Print suitability

UV • Screen print • Latex
